E-mail bug in Articles 0.12

Modules

A bug has been found in Articles v0.12 that prevents the e-mail to friend feature from working.

The next release of Articles will use the XOOPS built-in e-mail functions, so it will be fixed for that.

In the meantime, fixing the current version is a simple task: Open "email.php" in your favourite text editor and uncomment line 196 (remove the "#") and re-upload to your web space.

If the archive you have downloaded is articles_0.12**c**.*, then this has had the file modified already.

Apologies for this silly mistake!
