

## **Articles support e-mail address**

### **Modules**

The e-mail address used in the current and previous documentation included with the Articles module no longer works due to domain name issues.

If you do need to contact me via e-mail, please e-mail me at [andy@sirium.net](mailto:andy@sirium.net) - future releases will have the new e-mail address.

If you have contacted me about Articles within the last couple of months and have not received a reply, please feel free to e-mail me again.
